

**15 APRIL 2021 | VIRTUAL** 2.00pm - 8.00pm (IST)

Ministry of Petroleum and Natural Gas Government of India

Conquering Newer Horizons

# THE DRIVER OF GLOBAL ENERGY DEMAND

"Our approach for cleaner energy and low carbon economy will be guided by a well-defined energy transition road map with seven key drivers, as outlined by Hon'ble Prime Minister of India Shri Narendra Modi in October last year. This essentially means it will be a healthy mix of all commercially viable energy sources. We will attach high priority for maximizing deployment of energy sources, including biofuels, emerging fuels such as hydrogen, available within the country."

H.E Mr Dharmendra Pradhan Minister of Petroleum and Natural Gas and Minister of Steel

### INTRODUCTION TO HYDROGEN ECONOMY New Delhi Dialogue

A deep transformation in the energy sector is essential to achieve the decarbonised energy world envisaged by the CoP-21 Paris agreement. In this context, power from renewables will become an important component for achieving a transition to cleaner forms of energy.

Hydrogen is emerging as one of the important spokes in the overall energy vector with various colours associated with the smallest molecule as a prominent net-zero solution for reducing carbon footprints. Hydrogen can also enhance energy security by diversifying the fuel mix and providing flexibility to balance grids. Green hydrogen is gaining unprecedented political and business momentum with number of policies and projects expanding rapidly around the world. Many projects globally are under development to scale-up production of hydrogen and create infrastructure for storage, transportation and its usage. A convergence in efforts is critical towards ensuring significant share of hydrogen in the global energy system in the coming decades.

H.E Mr Dharmendra Pradhan, Minister of Petroleum and Natural Gas and Minister of Steel, inaugurates H-CNG plant and 50 H-CNG city buses in New Delhi on 20<sup>th</sup> October 2020.

## **OBJECTIVES OF THE ROUNDTABLE**

- The goal of this roundtable is to estimate the progress of hydrogen ecosystems.
- Across continents and contribute to creating synchrony among the global think tanks, the industry and governments to join forces for developing innovative and sustainable technologies at attractive costs.
- Assessing the potential of green hydrogen and its relevance in national energy Transitions.
- Sharing learnings of creating a hydrogen ecosystem and best practices.
- Exchanging views on the different technologies and potential for new projects, and thereby scope for international collaboration.

### AGENDA AND SCHEDULE – 15TH APRIL

IST	
14:00 - 14:10	<ul> <li>Welcome Address</li> <li>Ms. Shreerupa Mitra, Executive Director, The Energy Forum (The Streerup Porum)</li> </ul>
14:10 – 14:50	<ul> <li>Ministerial Session</li> <li>H.E. Mr. Dharmendra Pradhan, Minister for Petroleum and Na</li> <li>H.E. Dr. Sultan Al Jaber, Minister of Industry and Advanced Tec</li> <li>H.E. Mr. Angus Taylor, Minister for Energy and Emissions Redu</li> <li>H.E. Mr. Dan Jorgensen, Minister for Climate, Energy and Utilit</li> <li>H.E. Mr. David M. Turk, Deputy Secretary of Energy, United States</li> </ul>
14:50 – 15:50	<ul> <li>Session 1</li> <li>Continental Perspective (Japan, South Korea, Singapore, Australia Emerging Hydrogen Ecosystem</li> <li>Moderator: Dr. SSV Ramakumar, Director (R&amp;D), Indian Oil, India</li> <li>Mr. James Hetherington, Director, Hydrogen Strategy Team, In Industry, Science, Energy and Resources (DISER), Australia</li> <li>Mr. Eiji Ohira, Director General for Advanced Battery and Hydr</li> <li>Dr. R K Malhotra, DG, FIPI and President, Hydrogen Associatio</li> <li>Prof. Chennupati Jagadish, Electronic Materials Engineering, A</li> </ul>

#### Agenda
